PROJECTS

- **Basic Banking System**
  - Developed a feature-rich Basic Banking web application using HTML, CSS, JavaScript.
  - Delivered a comprehensive, user-friendly solution for basic banking operations like sending and receiving money.
- **Hospital Management System**
  - Developed a robust hospital management web application with Angular and Spring Framework with SQL database.
  - The application features include patient and admin authentication and management, CRUD operations for booking appointments, view previous bookings, view/filter/search bookings.
- **Quiz Management System**
  - Developed online Quiz Application in which admin can create Quiz and user can take the quiz and retrieve scores.
  - Integrated Spring MVC quiz management system with Spring Data JPA and MYSQL.
  - Secured the application with Spring Security using OAuth tokens.
  - Enhanced the project with Spring RESTful Web Services.

ACTIVITIES

- **Volunteer in Clean village awareness program:** Actively participated in a cleanliness awareness program conducted by the government in nearby villages during my diploma college years. Volunteered to conduct surveys and promote awareness about hygiene and sanitation practices.
- **Core member in GDSC in JNTUACEK:** Served as a core member of the GDSC at JNTUACEK, contributing to the organization of various programs such as "30 Days of Google Cloud" and other initiatives aimed at promoting technological literacy and innovation among students. Hosted a website for CELIT-2022 using Drupal for a college cultural fest for CSE department.
- **CSR activity volunteer for Women in Tech Scholarship:** Volunteered for the Corporate Social Responsibility (CSR) activity at EPAM, specifically focused on the "Women In Tech" scholarship program. Contributed by conducting Statement of Purpose (SOP) reviews and interviewing parents of girl students to identify deserving candidates for the scholarship aimed at supporting women pursuing careers in technology.
